EXPERIENCE

FRONT END DEVELOPMENT CONTENT ADVISOR | LogRocket

August 2025 – Present

- Joined LogRocket's Content Advisory Board to review and shape high-quality frontend development content.
- Collaborate remotely with a global team of developers and content creators to enhance industry-leading publications.
- Contributed to maintaining editorial standards, ensuring accuracy, clarity, and technical depth.

Projects

CAREERCOACH AI [Live Demo](#)

- Built an AI SaaS for ATS-ready resumes, tailored cover letters, and interview preparation.
- Integrated Google Gemini for resume enhancement, keyword analysis, and cover letter generation.
- Added voice-enabled interview practice with AI feedback for better user preparation.
- Used Clerk, Prisma/PostgreSQL, Inngest, and deployed on Vercel with 99.9% uptime.

CONNECTNOW [Live Demo](#)

- Developed a full-stack video conference platform with real-time chat, collaborative code editing, and an interactive whiteboard.
- Reduced tool-switching by 60%, integrated Clerk for authentication and Stream for messaging.
- Enabled multi-user CodeShare with <100ms latency using TypeScript and deployed on Vercel.
- Built with modular Next.js achieving 99.9% uptime and low-latency global access.

BANK MANAGEMENT SYSTEM

- Created a desktop banking system with secure user login, balance checking, fund transfer, and transaction history.
- Integrated JDBC with MySQL for database communication, ensuring robustness and exception safety.
- Designed a responsive GUI in Java Swing with exception-safe logic.
